

Dear Hiring Manager,

I am writing to express my strong interest in the IT Internship position at Costco Wholesale. As a student with extensive experience in software development, data processing, and system optimization, I am excited about the opportunity to contribute to Costco's technology initiatives that support its global retail operations.

My background offers unique value to Costco's IT team in several key areas. At Amazon AI Lab, I worked on the Deep Graph Library, where I implemented critical features that improved classification accuracy by 16%. This experience with high-performance computing and optimization could directly benefit Costco's inventory management and supply chain systems. Furthermore, my work in building Docker-based automated release pipelines and integrating AWS S3 deployment demonstrates my ability to streamline development operations – skills that could enhance Costco's software deployment processes and reduce system downtime.

My role as a Teaching Assistant has given me a distinctive perspective on system scalability and user support. Managing infrastructure and developing automated testing frameworks for hundreds of students mirrors the challenges of supporting Costco's widespread retail operations. I've created comprehensive testing systems with over 700 test cases, a skill that would be valuable for ensuring the reliability of Costco's critical IT systems, from point-of-sale to warehouse management software.

In my Database Research Assistant role, I handled massive datasets of over 400 million data points, optimizing queries and improving processing efficiency. This experience is particularly relevant to Costco's needs, as it could help optimize the processing of millions of daily transactions and improve the performance of membership database systems. My expertise in SQLite and data preprocessing could contribute to making Costco's data operations more efficient and reliable.

I am particularly drawn to Costco's reputation for technological innovation while maintaining its commitment to operational efficiency and member satisfaction. The combination of my technical expertise in system optimization, experience with large-scale data processing, and proven ability to work with complex systems makes me particularly well-suited to contribute to Costco's IT initiatives.

Thank you for considering my application. I look forward to discussing how I can contribute to Costco's technology team.

Best regards,
Stanley Yang
